DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the disclosure does include any section headings.

Appropriate correction is required.

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).

Art Unit: 2644

- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Objections

3. **Claim 3** is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 1 claims an audio reproduction system comprising an audio processing means.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. **Claims 2 and 3** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. **Claim 2** recites the limitation "voice-operated audio and/or video" in line 1. There is insufficient antecedent basis for this limitation in the claim.

7. **Claim 3** recites the limitation "audio and/or video" in line 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

9. **Claims 1-3** are rejected under 35 U.S.C. 102(e) as being anticipated by Finn et al., U. S. Patent No. 6535609.

Regarding **claim 1**, Finn et al. (herein, Finn) discloses a communication system (10/50), which reads on an audio reproduction system, the communication system comprises microphone arrays (15/55), loudspeakers (20/75), with the microphone positioned in neighborhood of the loudspeakers, and an acoustic echo cancellation apparatus (25/85), which reads on an audio processing means to amend the audio signal in dependence of the location of the listener, and means to obtain characteristics of the transfer functions from the loudspeakers to the listener (figures 1-2, col. 3, lines 37-52, 60-67 – col. 4, lines 1-11, and lines 35-41, 50-67, col. 5, lines 1-3, 46-51, and 61-67).

Regarding **claim 2**, Finn discloses everything claimed as applied above (see claim 1). Finn further discloses an acoustic echo cancellation means (25/85). The system is used for audible communication, which indicates voice-operated reproducing system.

Regarding **claim 3**, Finn discloses everything claimed as applied above (see claim 1). Finn further discloses audio processing means for use in a communication system, which indicates an audio reproduction system

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. **Claims 4 and 5** are rejected under 35 U.S.C. 103(a) as being obvious over Finn.

Regarding **claim 4**, Finn discloses everything claimed as applied above (see claim 1).

However, Finn fails to specifically disclose the voice controlled system. The use of voice controlled system used with audio reproduction is well known in the art. It would have been obvious to one of the ordinary skill in the art at the time the invention was made to modify the invention of Finn by implementing a voice controlled system for the purpose of enabling the user the convenience of the controlling with the device vocal commands or parameter rather than with manual manipulations.

Regarding **claim 5**, Finn discloses everything claimed as applied above (see claim 1).

However, Finn fails to specifically disclose a video reproduction system. An audio reproduction coupled with a video reproduction unit is common used in the art, such with televisions, home theater systems, DVDs, video camera, video telephones, etc. Thus, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to modify the communication system of Finn by providing video reproduction for the purpose of providing a user with the option of viewing the persons or subject or situation in which he/she is or had been engaged in communication.
